The Seeder's Digest

© 1942
By
J. D. Long

The J. D. Long Seed Co., Boulder, Colorado

No magazine that comes to our home is more welcome than the **READER'S DIGEST**. We have over 100 copies from "way back when" to the present.

I appreciate immensely the service it gives by dehydrating stories and articles originally too long for my reading budget.

This gave me a Bright Idea! Why not prune descriptions in our seed catalogue so that gardeners can grasp at a glance, or a couple glances, the essential facts regarding varieties?

No sooner said than done. No better time than right now to employ this method in preparing our 1942 Spring catalogue.

Another good reason is the increasing cost of about everything pertaining to making and mailing catalogues. With one exception—postage still the same, thank goodness.

I figure that if our former 64 page edition is continued, we will have to join the parade and increase many prices.

I might then say to you, as Dad is so often quoted as saying to Junior in the woodshed, "This is going to hurt me a lot more than it will you". I'd have to wrestle with the extra cost of the larger catalogue. And perhaps be left holding the sack. Increased prices might spell decreased orders.

This is largely guess work. No one, not even the high brow advertising expert, really knows. One school of thought says, I quote:

Vivid, flowery descriptions, enhanced by illustrations, preferably in colors, will appeal so much stronger than "digested" pages, as to repay cost of deluxe editions. Unquote. Far be it from me to discredit this theory. It has its "pints".

There's something else. Not all firms might succeed with my plan for our 1942 catalogue. OUR customers and prospective customers are nearly all real gardeners, large or small, who not only "know their onions" but other vegetables and posies.

They can visualize most of the flowers and vegetables we list, without illustrations and detailed descriptions. True, pictures do help find what you are looking for, and make you yen to buy and plant this and that.

But all the colorful printer's ink in the world can not improve the seed in the package you receive, from whatever source. Stop me if you've heard this one: An optimist is a guy who thinks he can grow vegetables and flowers like the pictures in catalogues and on seed packets.

As you know, there is a growing tendency to shorten things. Remember the old horse blanket size bills, from \$1.00 to \$1,000? (I can't recall any \$1,000 bills myself.) The present shorter and smaller bills much better.

Remember mustaches of the Gay Nineties and a decade or two after? Those luxuriant, stream lined soup strainer, handle bar models? I still wonder how they were grown to such colossal size long before we heard the praises of Vitamin B.

Then, too, we have shorter working days and weeks in office, store, factory and even "down on the farm". I was born many years too soon. We Iowa farmers were gluttons for "Double Features". Worked 8-hour shifts. Two shifts a day. No bank nite.

The short way is the hard way. Ever hear this one? About the man who wrote a five page letter to a friend, and finished with this apology: "Please excuse this long letter. I'm too busy to write a short one." The joke is that he wasn't trying to be funny. Mull this over. Rather interesting.

GET THE HABIT—USE THE INDEX is a helpful slogan. I myself lose much time pawing through catalogues without referring to index. Often wind up by getting down on my knees and asking the index to help me out.

Hard to classify everything under names each reader may be accustomed to use. In general, we use the common garden variety names, known to every dirt gardener. Not all readers may know that Antirrhinums are Snapdragons. But all know Snapdragons.

This reminds me of a squib in the Rocky Mountain News (Denver), by Lee Casey, one of my favorite columnists.

Lee told about a newspaper office needing a news item published some years back, regarding a cyclone. The head filing clerk was on vacation. The office force looked under headings: Cyclones, Tornadoes, Storms, High Winds, Twisters, etc., but to no avail.

Soon as the filing clerk returned, the force jumped all over him. The accused went calmly to the filing cabinet and found the data under "Regrettable Occurrences."

"Unaccustomed As I Am"

Unaccustomed as I am to blow my own horn, it is with colossal modesty that I let you tune in on the orchestra of the NEW ENGLAND GLADIOLUS SOCIETY.

I was unaware that the N.E.G.S. was rehearsing this selection, until I received, Dec. 24th, the following notice. Quote:

SPECIAL AWARD for 1941. The New England Gladiolus Society Awards Its Gold Medal to Mr. J. D. Long.

For continued service to advance Horticulture, especially the Gladiolus;

For original, valuable, and progressively up-to-date cultural directions given in readable language with humor widely known and appreciated;

For cooperation with amateur gladiolus societies and loyal support given N.E.G.S. for many years. Unquote.

This announcement appears in the wonderful 1942 Gladiolus Book sent to each member of the N.E.G.S. Dues \$1.00 a year. Albin K. Parker, Norwood, Mass., Secretary.

Says Sam: "You won't plant these—I hope."

Defense Gardens

"SELF DEFENSE" GARDENS. Not saying much about defense gardens. Newspapers, magazines, radios will amply stress this idea.

As I see it, every garden can help in National defense, and at the same time be planted and cared for in SELF defense. Thus you can be patriotic and selfish.

Some things are so obvious that it seems almost silly to recommend or suggest. The back yard vegetable garden yields eats, and costs little to plant and care for.

Flowers not a luxury. Their care and enjoyment may do more than anything else to keep one fit, both mentally and physically these days of National and personal anxiety.

Garden expense small, yet returns cover weeks and months. Compare this with many other ways money is spent for diversion and pleasure.

Summed up, just plain good sense to have a garden, and give it a worthwhile chance.

Darling Pompons

CUTE LITTLE DAHLIAS

Pompons are the show or quilled type. Some blossoms are almost as round as a ball. The charm of these Pompon, Lilliput, Pewee or Midget Dahlias is due to their being small, prim and precise, instead of big, careless and informal.

Pompons measure only 2 inches or less in diameter. Don't enrich the soil for pompons. Work for size of bloom on your mammoth varieties, but keep the Pompons small and "just as sweet as they are."

Pompons "bloom and bloom and bloom." They are the answer to the question, "Why don't Dahlias last longer in bouquets?" Well, Pompons DO last longer. And such charming bouquets as they make!

"Safety-First" Purest Lawn GRASS SEED

**YOUR POSTMASTER WILL TELL YOU

The nicest lawn that I have seen,

As smooth as silk, and lovely green,
Was grown from seed, our "SAFETY-FIRST,"
And watered oft, to quench its thirst.

Best White Dutch Clover

Clean seed of bright golden color and strong vitality, "parin' to go." Sure fine. Lb. \$1.20, 2 lbs. \$2.30; 3 lbs. \$3.30, prepaid, any zone.

Sow "Safety-First" and avoid seeding your lawn with noxious weeds found in cheap grass seeds. You get so much higher germination that a pound of the best will cover as much as two pounds of the cheap seed.

New lawns should be thoroughly worked, leveled and allowed to settle, then leveled again. The more care before sowing the seed the better the results. Seed will wash to the low spots and make your lawn spotted. Sow not less than one pound to 200 square feet.

Sow part the seed one way and then some more crosswise, so as to avoid streaks. Rake well before and after sowing. Water gently so often that soil never dries out until lawn is green. Clover comes quickly. Blue grass comes slowly but hangs on like grim death after gets a foothold.

Old lawns should be re-seeded and fertilized from time to time. Use only the purest seed. Never be afraid of sowing too much seed, nor too often. Dandelion and other weed seeds are blown or carried on to the lawn. Give the lawn a break by sowing grass seed often, to compete with dandelion seed.

If feed your lawn some White Dutch Clover,
The ground will soon be green all over.
And then almost before you know,
You'll hafta up and start to mow.

Our Best Mixed Lawn Seed

Many professional lawn makers use 8 pounds Ky. Blue Grass to one pound White Clover, same as we offer. Lb. 70c; 2 lbs. \$1.30; 3 lbs. \$1.90, prepaid, any zone.

PLANTS SHIPPED IN SPRING ONLY

Mastodon

Very robust and thrifty. Plants set out in spring begin bearing in July or early August, continuing until heavy freezing weather. Leaves are large and of heavy texture, well protecting berries from sun and rain. The berries are borne in clusters on strong stiff stems. Some of the larger berries will not go through the top of a quart milk bottle.

Early Gem

Plants and leaves just naturally small. Berries not so large as Mastodons, but earlier. One set of prices for BOTH MASTODON AND GEM plants. You can take part each of the two kinds to get the quantity prices.

Plants are put up in bundles of 25. So make up your order, for example: 25 of one kind and 75 of the other, or 50 of each kind, to get the 100 rate. Or, 150 of one kind and 250 of another to get the 400 rate, and so on.

Read This Page Before Order Vegetable Seeds

The 32 green pages were all printed early—before our new supply of garden seeds came in.

I knew some kinds would yield poorly, and some almost a failure. And that some prices would have to be higher. Also that in order to supply all our customers, we would have to limit the amounts of some kinds to each customer.

But believe you me, I was not prepared for the drastic shortages that finally developed, and the increased costs to us, in many instances.

In accordance with our policy of keeping prices as near painless as possible, we have increased some prices only a little, as noted below. Conditions would justify our increasing them decidedly more. You will find them still very reasonable compared to prices the country over.

No lower prices for larger lots. And we prefer no order calls for larger quantity than quoted below. This refers only to the kinds listed at revised prices on this page. Believe can supply as much as you need of other seeds we list. Hope so.

HOWEVER, all offers are subject to our being able to supply. We reserve the right to refund if any stocks sold out.

A **BETTER PLAN** is for you to say on your order, that if we are sold out the variety ordered, we shall select another good kind instead. I suggest you do so THIS season, no matter from whom you order.

Long's Short Talks

A word often misunderstood, abused and misused is **SUBSTITUTE**. This for the reason, I suppose, that those who have been granted the right to substitute, or have assumed that right, have taken advantage of the power granted them, and not given full value in the article "just as good".

As a matter of fact, in our own business, we can and do often send a better variety or better value, if it is left to us to make another selection. I can't for the life of me see how any business can survive, or thrive as well as it might, if it does otherwise.

I'm not urging you. Am just telling you, that this is one time when for the sake of time saving, efficiency, and making sure of getting your order filled, it's a good idea to state if is O. K. with you for us to make a second selection if sold out kind on your list.

Finally, however, if we do make and send another selection, it will always be subject to your approval. If we have not pleased you, return at our expense for full cash refund. Guess that takes care of everything along this line.

Our free printed garden helps do help. Can not cover all your needs, but here is what we do send with orders.

With Gladiolus bulbs, if order is for 50c or more, our booklet **GLAD GOSSIP**.

With Dahlia orders, our leaflet, **DAHLIA DON'TS**. Will help a "right smart", as my friend from Missouri is supposed to say.

With Summer orders for Pansy and Iceland Poppies we have a free leaflet dealing with summer and early fall sowing of these seeds.

With Iris orders, Summer and Fall, goes a very helpful folder. Not much more need be said regarding how to get best results with your Iris plantings.

"Long's Long Count" is well known to our Gladiolus bulb buyers. By the way, take a tip from me, and **BE A "BULB SNATCHER"**. See page 23. I did say no extras promised. **BUT**, I have a hunch we will forget what I said when we fill your "Bulb Snatcher" orders.

Have seldom mentioned in catalogues anything about free packets of seeds we slip in with your seed orders (of 25c or more); the larger the order, the more free packets. These are of our own selection, especially provided for this use.

It's my thought that even if you cannot use the extra packets, you have neighbors and friends who would be happy to have them. You might even mail them when writing letters to some of the folks "back home."

Want to thank you who send names of neighbors and friends whom you believe might like our stocks and our way of doing business.

What helps still more, is your saying something to these same folks so that when they receive our catalogue they will not say, "Just another catalogue."

"Something New Has Been Added"

With every seed order of 25c or more we send you a copy of my new 16 page vest pocket booklet, **SEEDER'S DIGEST**. Read more about this on page 2, this catalogue.

"Thanks for listening". Thanks for orders, kind words, an' everything.

Sincerely, J. D. LONG.

New Zealand Splendor Glad

A New Super Glad

"New Zealand Splendor"

(Originated by W. R. Toon, New Zealand)

Probably the best Glad introduced into U.S.A. from New Zealand.

The plant and spike sturdy and strong. Blooms large. Many open. A crooked spike or misplaced bloom "very unusual".

The color is medium pink, with throat blotch of orange-scarlet. The shade varies somewhat, depending on soil and weather.

The florets set close to the spike, and are well faced and spaced. They look you right in the eye.

New Zealand Splendor is a Picardy and Mrs. S. A. Errey seedling. Thanks to Canada and Australia as well as New Zealand.

A large successful commercial grower bought a few "Splendor" bulbs last season. Wrote us: Zealand Splendor did fine. Made beautiful spikes. I like the placement of the florets and their leathery texture. Looks to me like a comer.

The sturdy growth of the plant impressed me. That is lacking in a lot of good Glads today.

N. Z. SPLENDOR: (L. 40c; 3—\$1.00; 10—\$3.00) (M. 25c; 3—60c; 10—\$2.00) (S. 15c; 3—40c; 10—\$1.20). (No bulblets to spare.)

New Zealand Splendor makes a hit.
No other name could better fit.

Choice Named Varieties of GLADIOLUS

Please do not order in smaller quantities than listed. (5 or more bulbs at the 10 rate; but must amount to not less than 10c.)

No single item less than 10c. Five bulbs at the 10 rate, unless otherwise noted.

Airy Dream (Baerman.) Apple blossom pink. (L. 30c; 3-75c; 10-\$2.40) (M. 20c; 3-50c; 10-\$1.60).

Aladdin (Palmer.) Big bright salmon, with cream blotch. (L. 15c; 2-25c; 10-\$1.20) (M. 2-15c; 10-60c).

Alayne (Kinyon.) Beautiful new shade of light rose. Never flecks. (L. 2-12c; 10-50c) (M. 3-10c; 10-30c) (S. 10-20c).

Algonquin (Palmer.) Brilliant glowing red. Very large and fine. (L. 15c; 2-25c; 10-\$1.20) (M. 2-15c; 10-60c).

Algonquin tops the giant reds.
Add this when plant your Gladdy beds.

American Commander (New.) Similar to Com. Koehl. A little lighter, clear red. Tall straight spike. Large. (L. 40c; 3-\$1.00).

With Shirley Temple now so cheap,
You can plant and grow a heap.

Simcoe (Vickers.) Light purple, flaked darker. (L. 10c; 10-80c) (M. 2-12c; 10-50c).

Smiling Maestro (Christ.) Deep salmon-rose, flaked brown. Large exhibition type. (L. 2-12c; 10-50c) (M. 3-10c; 10-30c).

Snow Princess (Pfitzer.) Immense white. Good spike. Blooms well placed. (L. 10c; 3-25c; 10-80c) (M. 3-15c; 10-40c) (S. 10-25c) (Blts. 25-25c).

Snow Princess is a big new white,
You won't go wrong, if say, "I'll bite."

So-Big (Kinyon.) Very large light rose pink. Early. (L. 2-14c; 10-60c).

Sonatine (Pf.) Very tall, large, early, lustrous pink, with non-kinking spike. Not a "Saxophone" spike in a carload! (L. 2-12c; 10-50c) (M. 3-10c; 10-25c) (S. 10-15c).

Too bad that dame, "Our Clementine,"
Grew ducks instead of Sonatine.

Southern Command (From New Zealand.) A new show variety. Opens up to 12 in good condition. Peach red, shaded bright scarlet at edges. Lighter center. Tall robust grower. (L. \$1.00; 3-\$2.40).

Southern Cross (New Zealand.) Large red early. (L. 2-12c; 10-50c) (M. 10-25c) (S. 10-15c).

In selling Glads, you'll take no loss,
If you will grow some Southern Cross.

Stella Antisdale (Evans.) Exhibition light pink. 7 to 9 large blooms open. Long flower head. (L. \$1.00; 3-\$2.40) (M. 60c; 3-\$1.50) (S. 30c; 3-75c) (Blts. 4-25c).

St. Lawrence (Christ.) Bright scarlet with cardinal throat. (L. 2-15c; 10-80c).

"WEED 'EM AND REAP"

Sweetheart (Prestgard.) Lovely white with pink edges. Well named. **EARLY.** (L. 2—12c; 10—50c) (M. 3—10c; 10—25c).

If stunning beauty you would find.
Then cut some Sweetheart, all one kind.

Taiaroa (New Zealand.) Salmon-pink, flaked slate with purple blotch. Immense exhibition Glad. (L. 2—14c; 10—60c) (M. 3—12c; 10—35c).

Takina (New Zealand.) Massive. Rosaline purple. (L. 2—14c; 10—60c) (M. 3—12c; 10—35c).

Takina came from "way down under."
It makes you stop and look, and wonder.

Timbuctoo (Zimmer.) Early dark rose-red. (L. 15c; 3—40c) (M. 10c; 3—25c) (S. 2—15c).

Tunia's Blue (Both.) Large blue-violet. (L. 15c; 3—40c).

Tunia's Triumph (Both.) New giant exhibition salmon-red. Many large blooms open. (L. 2—25c; 10—\$1.00) (M. 15c; 2—15c; 10—60c) (S. 3—15c; 10—40c) (Blts. 20—25c).

Uncas (Webster.) Deep coppery orange. 8 large blooms open. (L. 10c; 3—25c; 10—80c) (M. 3—15c; 10—40c) (S. 3—10c; 10—25c) (Blts. 25—15c).

Vagabond Prince (Palmer.) Bronze-red, with rich orange-red blotches. (L. 2—14c; 10—60c) (M. 3—10c; 10—30c).

Valeria (Pruitt.) A very unusual soft shade of red. (L. 12c; 3—30c; 10—\$1.00) (M. 2—15c; 10—60c). Scarce. No lower rates on larger lots.

Vista Bonita (Ellis.) Immense geranium pink. (L. 20c; 3—50c; 10—\$1.20) (M. 10c; 3—25c; 10—80c).

Wasaga (Palmer.) Clear buff, ruffled. (L. 2—12c; 10—50c) (M. 3—10c; 10—25c) (S. 10—15c).

Wasaga's color can't be beat,
That Glad looks good enough to eat.

White Spire (Kinyon.) Mammoth blooms of white. (L. 30c; 3—75c) (M. 20c; 3—50c).

Zuni (Mitsch.) Some experts say this is today the world's No. 1 Smoky Glad-olus. A rich, sparkling silvery-rose, lit by a large terra cotta throat. (L. 10c; 3—25c; 10—80c) (M. 2—12c; 10—50c) (S. 3—10c; 10—30c).

Tall Zuni now brings up the rear.
Loud praise for it is all we hear.

Exhibition Mixed

Each order mixed from fine named varieties, our selection, none labeled.

(L. 12—50c; 50—\$1.80; 100—\$3.20) (M. 12—25c; 50—\$1.00; 100—\$1.75).

Long Season Mixed

These Long Season MIXTURES are made up of named varieties. The bulbs are also mixed sizes, but kinds not labeled. Many grand varieties seldom, if ever, used in mixtures of any kind.

The bulbs are blooming sizes, from half inch or so up to nearly inch and a half. Bloom a long time.

The number of bulblets in a packet is based on somewhat less than the 100 price for that variety. Real good values always. The larger the order the more liberal the overcount.

"Glad Gossip," 10 Cents

"Glad Gossip" is a 24-page booklet I wrote to help both amateurs and professional growers get the most pleasure and profit from their Glads. Doesn't tell all there is to know about Glads, but tips you off about many points of vital interest.

Among other things, about eight pages are given to thrips. Many who followed my suggestions last season solved their thrips problems, and have renewed their enthusiasm for growing Glads as a hobby or for market.

The price is 10 cents. If not worth 10 cents then it isn't worth sending for. It's been worth dollars to many Glad growers. You'll be surprised.

Free with Glad orders amounting to 50c or over, if asked for when order is sent. Otherwise, 10c please.
